EXPERIENCE

September 2025 – Present

Data Technician | J.L. Morgan & Associates, Inc. | Birmingham, AL

Managed healthcare research databases, ensuring HIPAA compliance and data integrity. Performed data entry, verification, and quality audits across multiple systems and hundreds of clients. Developed and implemented a custom Python-based auditing system from scratch for OAS CAHPS surveys, automating compliance workflows and reducing manual review time.

August 2024 – June 2025

Order Processing Specialist | Cullman Cabinet & Supply | Cullman, AL

Processed high-volume client consultations for business-class accounts, delivering rapid response times and maintaining exceptional customer satisfaction. Designed and deployed a full-stack online ordering system using Vue.js for the frontend and FastAPI (Python) for the backend, modernizing the company's paper-based pipeline and improving operational efficiency.

September 2023 – September 2024

Co-Founder & Lead Software Engineer | ProseWrite | Buffalo, NY

Spearheaded launch of audio-to-text transcription software serving applications from professional documentation to creative writing. Engineered full-stack architecture using Angular and Python, ensuring responsive UX and scalability. Secured \$5,000 in startup funding from Microsoft Founders Hub.

November 2021 – September 2023

Data Scientist Apprentice | IBM | Buffalo, NY

Delivered data solutions for Fortune 500 clients across automotive, pharmaceutical, and banking sectors, ranging from exploratory analysis to production data pipelines. Represented IBM at a Regeneron Pharmaceuticals hackathon, developing sentiment analysis pipeline that secured multi-year research contract.

EDUCATION

May 2021

AAS in Computer Information Systems | Calhoun Community College | Huntsville, AL

- Certificates: Computer Technician, Programming Essentials
- Cum Laude; GPA: 3.7

SKILLS

Computer Programming

- Python
- SQL
- JavaScript
