WORK EXPERIENCE

Cullman Cabinet & Supply

Order Processing Specialist

August 2024 – Present

Cullman, AL; Now Remote

- Managed high-volume client consultations for business-class accounts, delivering rapid response times and maintaining exceptional customer satisfaction through expert product knowledge and streamlined communication processes
- Developed comprehensive process documentation across 4 roles and created custom inventory management databases, resulting in accelerated new-hire training timelines and improved facility-wide tracking efficiency
- Began designing and implementing an online ordering system to modernize the company's paper-based pipeline, enhancing operational efficiency and customer experience

ProseWrite

Co-Founder & Lead Software Engineer

December 2023 – August 2024

Buffalo, NY

- Spearheaded the launch of ProseWrite, an innovative software transforming audio into edited text, serving a broad range of applications from professional documentation to creative writing
- Engineered the software's architecture using Angular and Python, ensuring a responsive user experience and scalability for future growth
- Successfully led the team through the startup phase, culminating in securing \$5,000 in startup funding from Microsoft's Founders Hub due to the project's innovation and market potential

IBM

Data Scientist

Nov 2021 – Sep 2023

Buffalo, NY

- Engaged in client projects with international auto manufacturers, leading pharmaceutical companies, and national banking firms; project scopes ranged from exploratory solutions to building data pipelines
- As a Data Scientist Apprentice, completed rigorous 6-month training with industry experts, obtained various certifications, and transitioned to client consulting and leading technical project divisions
- Represented IBM in a Hackathon at Regeneron Pharmaceuticals, competing against three technology firms to develop a sentiment analysis pipeline for a new cancer drug by analyzing hundreds of hours of audio interviews with doctors, nurses, and various hospital staff. This culminated in securing a multi-year research contract for IBM

EDUCATION

John C Calhoun State Community College

Associate of Applied Science in CIS Computer Programming

Graduated May 2021

Huntsville, AL

- Studied various fields such as Linux Server Admin, Computer Programming, Computer Forensics, and CISCO Networking
- Cum Laude; GPA 3.7
